Subject: Comments on Proposed Reg. 6

Attn: Carol Booth

The ADEQ has in place the proper permits and procedures to fully protect and monitor the Buffalo Water Rivershed. We do not need more over regulation of our farming here in the great state of Arkansas. We are quickly nearing an Ag deficit in this country, and what we need now more than ever are common sense ruling and regulations in order to continue provide the best and safest food supply in the world. The greatest security threat to a country is a weak food supply chain. Let's make Arkansas a leader among this great Nation by ensuring that Arkansas Farmers and Ranchers are able to keep producing some of the best food, fiber, and shelter without being over regulated. We live where we work and we love what we do. Trust us to keep up the great work.

Regards,
Mike Richardson
