Subject: Comments Reg 6

As a resident of Newton County, AR. I have an interest in not allowing old permits to become operational. The four still “active” permits have not complied with annual reports and should be closed permanently. To change them to reg 6 after they have not complied for years is a violation of the law. The loop hole that the old permits could be possibly reopened after years of reporting violations by the Director is not protective of the watershed and shows preference to those who knowing violating their permits.

I agree with and support the more detailed comments submitted by the Buffalo River Watershed Alliance.

Respectfully,

Susan Watkins
