Subject: Investigatng C&H Pond Problems

Sir or Madam,

I support the Buffalo River Watershed Alliance in their desire for true transparency in the drilling procedure to determine if hog waste is leaking under the C&H ponds. I urge you to comply with the following requests:

- Please announce publicly in advance when the drilling will occur.
- Prior to the drilling, please reveal what steps ADEQ will take if hog waste is discovered in the soil or bedrock underneath.
- Drill to 120 feet as has been recommended rather than just 100 feet you have announced.
- Drill three bore holes rather than just one. Citing added cost is not credible; the main cost is getting the equipment to the site.
- Do not allow BCRET to have more than one observer on site during drilling, and only then if BRWA's preferred expert, Dr. Bert Fischer, is also present. Using Mr. Hubbard as an observer is only acceptable if NO BCRET observers are present.
- Conduct dye tracing using the completed bore hole before it is filled back in, while the above indicated observers are on site.

Thank you.
