Subject: Investigatng C&H Pond Problems

Good afternoon,

My expectation is that a representative from the Buffalo River Watershed Alliance will be invited to observe the drilling at C and H Farms that has been postponed from August 8 to a future date. In the spirit of cooperation and clarity for the public I believe observation by a representative of BRWA is a mandatory minimum requirement. I am also in favor of 3 bores to 120ft. The fixed cost is most likely getting the first bore drilled and adding an additional 20ft. to the recommended depth of 120ft in 3 bores would strengthen outcome of this project. Cathy Ross
