Subject: Investigatng C&H Pond Problems

Dear ADEQ folks,

Please be sure to do a thorough, transparent and science-based investigation. If you don't allow third party observers from the BRWA then you can assume your findings are not going to be trusted. Do make sure to allow BWRA to participate to quell their fears. This is sure a lot of time, effort and money spent on poorly sited hog farms. This is just a bad idea, this practice needs to stop! Arkansas is a big state. There is plenty of room for hogs, right here in the Buffalo River Watershed? Makes no sense at all.

We love the Buffalo River and there is no other place like it. My son floated the entire length in his lifejacket last year when we were out there. This place is a treasure, for goodness sakes take care of it! We all need to know there if there is a problem and your investigation should be very detailed to get to the bottom of any issues so they can be properly resolved.

Thank you for your kind consideration.

Sincerely,

Stephanie Dzur & Family
