Subject: Investigating C&H Problems

I am hopeful that the full BRWA recommendations will be used in the upcoming investigation of the C&H groundwater contamination. I am quite concerned about the effect this potentially has on the Buffalo River. As a former frequent visitor to the river I would like to see a much more rigorous protection of the watershed. Over the past 30 years I have floated and swam in the river nearly every month and also camped on the Buffalo with my children and grandchildren. I have not been able to even bring myself to visit the Buffalo since the Hog Farm was built. I just find the whole issue so disgusting. Even the possibility of contamination of this precious resource is so repulsive that it is no longer an enjoyable experience. Such a shame. I hope all possible steps are taken to assure that others can continue to enjoy the resource.
