Subject: Investigatng C&H Pond Problems

Please work with the Buffalo River Watershed Alliance in providing transparency in determining if hog waste is leaking from the ponds at the hog factory. We all are committed to make sure the facts are known. I would be very happy to learn that no wastes are leaking from the ponds, but I am not very optimistic that this will be shown to be true. The time has come to learn the facts and take appropriate actions.

Thanks,
Gene Staggs
