Date: Monday, August 8, 2016 3:30:18 PM

We are writing to thank you for pursuing drilling and testing at the C&H Hog Farm and respectfully ask that you work to ensure that this process is thorough and transparent so that its results are definitive and above board. Please drill to the recommended 120 feet in at least three locations. Also, please consider dye testing before the drill holes are sealed so that we will know more clearly how far and how fast potential contaminants can spread. Finally, we ask that credible observers who are not members of the Big Creek research team be assigned to monitor this testing.

Like you, we are proud that Arkansas has been entrusted with the first national river and we hope to prove worthy of that legacy. Please, let's make our next steps clear so that our motives and actions can't be questioned when we are called to account for the protection we provided this river that is both a local treasure and a national asset.

Thank you for your consideration in this important matter.

With regards,
Larkin and Pam Floyd
