Subject: Investigatng C&H Pond Problems --- received after comments closed

9 August 2016

To officials at ADEQ
Director Keogh,

I do not understand. Why would ADEQ agree to investigate the possible leakage of waste ponds at C & H Hog Factory and then only drill once when 3 bores have been recommended? Why would that one bore only go down 100 ft., when 120 ft. is recommended? Why would ADEQ agree to drill and then plan to do only part of the job? Why would ADEQ want to set this whole thing up only to have interested parties say afterwards - yes the testing was agreed to, but it was only done part way. Why would ADEQ use taxpayers money to only do part of the job?

I do not understand many things about why C&H Hog Factory was placed in and then allowed to operate in the Buffalo River Watershed. But now this?

Thank you,
Glenda Allison
