This is a request that the ADEQ conduct the drilling test with the utmost transparency and fairness as the Department originally promised. It appears that the actual work order is stepping back from this promise and appears to be showing bias in favor of the farm before the actual testing even begins.

I urge the Department to clear up the impression that the welfare of the Buffalo River is not a priority of the ADEQ. The testing needs to be done in a manner so that all parties are comfortable with the process and the results.

Respectfully,  
Lloyd & Linda Stith
