Subject: Investigatng C&H Pond Problems

To whom it may concern:

If your goals for transparency and the conservation of the Buffalo National River are your true intent, please consider cooperation with the BRWSA. Dr. Bert Fisher should be present during the investigation for the sole purpose of impartiality. If the equipment is on site why would you not take the recommendation of drilling 120' as well as the 2 additional samples? Please ease the mind of the general population, who not only consume your products but who also like to enjoy the beauty of the Buffalo National River. Please be true to the transparency you claim to be striving for.

Thank you,
Lyndsey
