Good evening.

Why is ADEQ in such a hurry to complete the drilling study that has recently taken place at the C & H Hog Farm. Is there something to hide? Why is the 500 plus page report and data not available for the scrutiny that is critical to the environment of the Buffalo River watershed?

Would it be possible to please extend the public comment/question length of time to at least December 23? This would give give the public a better opportunity to review the drilling report, and to submit questions regarding this 500 page plus report.

Thank you for your consideration.

Sarah Thompson
