Department of Environmental Quality

C&H Hog Farm Pond Integrity Evaluation

DAILY UPDATES

Wednesday, September 21, 2016

Drilling activities began at C&H Hog Farms on Wednesday, September 21. Crews mobilized and arrived on site Wednesday morning and work began at 1:00 PM. Work ended for the day about 5:00 PM with the drilling having reached a depth of 48 feet. Activities were conducted in accordance with the accepted Drilling Study Work Plan. Work is expected to resume early Thursday morning.

Samples were collected and split in accordance with the Work Plan. ADEQ staff delivered split samples to representatives of the University of Arkansas Agriculture Diagnostic Laboratory at a location in Jasper. The remaining split samples were transported to ADEQ's laboratory in North Little Rock on Wednesday night.
