Subject: Anti degradation methods

Importance: Normal

I am writing to urge AADEQ to protect high quality streams in all of our state and national parks, wildlife refuges and other wilderness areas. Please also include tributaries to these streams or rivers as these tributaries eventually are what makes up the bigger stream or river. Please establish baseline water quality standards with scientific testing and use numeric standards rather than narrative standards. Thank you for your attention to these requests. We must do all we can to protect the quality of our waters. Annee Littell, 517 E. Johnson St., Fayetteville, AR 72701
