Subject: Continuing Planning Process & Antidegradation Implementation Methodology

Importance: Normal

Dear Jacob Harper,

As you know, we are in the midst of destroying our planet-Earth-by altering the climate with our old fashioned destructive ways. Nothing is more important than our air, water and soil. We must learn how to live in harmony with nature. Relaxing any standard in place to protect these resources is unacceptable. No amount of pollution is acceptable. Would I pay more for clean energy? YES! Would I give up my car for public transport or to buy an electric vehicle? YES! We all must.

I urge DEQ to protect the streams and lakes my fellow Arkansans and I use for drinking water, wildlife watching, fishing, swimming, and boating. Please be sure that the CPP and AIM:

- Protect high quality streams in our state and national parks, wildlife refuges, and wilderness areas from new pollution.
- Properly establish protected baseline water quality through testing and data analysis.
- Account for non-point sources of pollution when making point source permitting decisions.

Further, I support the the comments submitted by Ozark Water Watch, Arkansas Public Policy Panel, and their partners.

Thank you for your consideration.

Sincerely,

Ms Deborah Meldahl
