Subject: CPP for AIM

Hello,

As a member of the arkansas canoe club, I encourage adeq to create policies that will protect our waterways for the wildlife that depends upon them and our children. SO much of the state's economy depends on high quality water and protecting the integrity of our waterways will be an important step. I would ask adeq to consider the following when creating and implementing new policies:

- Protect high quality streams in our state and national parks, wildlife refuges, and wilderness areas from new pollution.
- Properly establish protected baseline water quality through testing and data analysis.
- Account for nonpoint sources of pollution when making point source permitting decisions.

Thanks very much,

T Yamashita
