Hey Teresa,

Did you send a printed letter to ADEQ and EPA? I am afraid all these pdfs are a recipe for getting a half loaf on the record. You should be able to create a multipage pdf. But in any case, please make sure a hard copy goes in the mail before the deadline tomorrow afternoon.

Emily

**Subject:** National Parks Conservation Association comments on the proposed 303(d) list

Dear ADEQ,

Please find attached the official comments from the National Parks Conservation Association with respect to the 2016 proposed 303(d) list of impaired water bodies in the state of Arkansas. I hope and look forward to the agency initiating substantial changes to include using all available data and greatly improving the transparency of the entire evaluation and review process.

Best Regards,  
Teresa Turk
