Dear Mr. Wise and Ms. Keogh,

Thank you for this opportunity to comment on Draft 2016 303(d) Impaired Waterbodies List. I do not understand why ADEQ is not recognizing the data assembled by the National Park Service in the issue of Mill Creek, Bear Creek, and Big Creek. ADEQ is supposed to be concerned about possible environmental dangers to the public. Arkansas entertains many visitors in our Buffalo National River Park Area. I swim in this river, so does my 6 year old granddaughter. Is the possibility of sickness to my family and these many visitors being ignored?!

Please provide answers to the comments you have received.

Thank you,  
Glenda Allison
