Subject: RE: bear creek

Mr. Horton,

We are unable to pinpoint the exact source of the solids. It could be from the land use in the watershed, or the point source discharge, or a combination of both. We do encourage the landowners in the watershed to continue being good stewards of the land and will continue working with the point source.

Jim

Mr. Horton,

Bear Creek is listed for Total Dissolved Solids.

Jim

Hello,  
Can you tell us what pollutants you are concerned with?

thanks,  
jim horton
