Dear ADEQ,

As a resident of North Central Arkansas, I am concerned with the purity and protection of the Buffalo River. This stream is the reason that my wife and I currently live in Arkansas. Coming from Illinois, I took a canoe-camping trip on the river and decided that we would retire here, which we did 15 years ago.

To see that the State Dept of Health has issued a warning to veterinarians about the toxic algal blooms is very troubling. Please do everything possible to save this beautiful resource from hog farms and other polluters

Sincerely,
Bob Carlson
