Subject: Big Creek and Buffalo River Impairment Comments

Dear ADEQ:

Due to the recent impairment categorization of sections of Big Creek and the Buffalo National River I request that both water bodies be designated as “Category 5” to ensure that an investigation will be made to determine the source(s) of contamination. Logically we cannot control or remedy a deteriorating situation if we do not understand the root causes. As stewards of both of these streams Arkansans deserve and demand to know what is contaminating our nation's first National River.

Thank you!

Sincerely,

Craig J. Gann

Little Rock, AR
