Dear Ladies and Gentlemen of ADEQ,
Every week, every day, every moment we wait, the problem of our impaired Buffalo River watershed will get worse. I am sure anyone and everyone knows in their heart of hearts where the source of the problem is. There is very clear evidence that there is pollution contaminates coming from the C&H hog factory and the permit denial should be upheld and now most importantly enforced. Big Creek and the Buffalo should be labeled as category 5. Please do the right thing and start the process of cleaning up this mess. Thank you, David Finch, 2745 Collins Drive, Conway AR. 72034
