Subject: Buffalo National River
Date: Sunday, August 12, 2018 12:11:56 PM

Determination of impairment of the Buffalo River based on scientific evaluation of the deterioration of water quality should be more than enough evidence for ADEQ to perform it's constitutional mission of protecting the environment and natural resources of the State of Arkansas for all of it's citizens instead of protecting the extremely narrow interests of one poorly executed business plan.

Shut down the C and H Hog operation immediately.
