ADEQ;

We demand that you fulfill your mission to protect this unique and irreplaceable resource. Put an immediate stop on this hog farm and any others. This incredible resource of recreation brings more money to Arkansas than 10 hog farms ever could. If you ruin this river then you might as well burn the whole damn state. You people disgust me when you put your pockets before mankind.

Can we also pass a law that only allows water safe sunscreen be used as it also pollutes the river.

I would like to ask if you could not schedule a weekend where all the lovers of the Buffalo show up with rakes to remove as much of this green algae as possible put it on the shore to die in the sun. Would this make a difference is my question?

A couple of years ago a paddle wheel boat sunk on the Arkansas River someone put a pump in the boat even though the boat was under water so they were pumping the river out of the boat into the river??? Was this your organizations Idea?
