Questions Comments:

Dear Sir: This in regards to the listing of the Buffalo River & Big Creek as a Category 4d on the 303d List of impaired Waterbodies. We respectfully request that this placement be upgraded to the high priority category 5 listing. The Buffalo river as a national treasure deserves the highest level of monitoring and protection that the state can offer. The degradation of the river has been increasing the past few years. We are depending on ADEQ to locate the sources & reasons for this sad development and begin remediation. Please do your job.
Sincerely,
Lloyd & Linda Stith
