Arkansas Department of Environmental Quality,

The issue with the C&H Hog Farm is totally out of hand. This majestic river is worth so much more to Arkansawyers than any amount of money that the hog farm is generating. Dr. Neil Compton of Bentonville worked tirelessly many years ago to gain the designation as a National River for the Buffalo River. Can you even begin to imagine how disappointed he would be to see what the Arkansas Department of Environmental Quality has allowed to happen to this river? My family has used this river for many, many years but my new great-grandson will not have the same experiences because of the actions of this organization.

Please, please protect the Buffalo River for the people of Arkansas. I can't even imagine being in a position to protect this river and turning my head away from my responsibilities. Remember, you work for the people of Arkansas, not C&H Hog Farm!!
