Questions Comments:

Dear sirs, Though I am speaking for myself, I know that there are many others like myself who are concerned over the Buffalo River situation which Big Creek ties into that I feel is not being checked into fully. The 3D report covering impaired streams should consider raising the category to level 5 in it's consideration of concerns. I ask that this be looked into in the possibility of implementing this change to protect this national treasure. Thank you for allowing us to voice our concerns, Rob Thomason
