Proposed 2018 Impaired Waterbodies List
ADEQ Headquarters
5301 Northshore Drive
North Little Rock, AR, 72118
303d Waterbody Comments
WaterbodyComments@adeq.state.ar.us

Director Keogh, Caleb Osborne, and Sarah Clem:

Nutrient overloading and pathogens from raw animal waste are impacting Big Creek and the Buffalo River. It is critical that ADEQ change the status of Big Creek to category 5 and take direct actions to remedy the pathogen and dissolved oxygen impairments. ADEQ can restore our clear mountain streams for fishing, recreation, small local family farms, and businesses that depend upon clean fresh water.

Please protect fresh water and natural resources in the Natural State.
Let's reverse the assault on our sparkling water bodies by cleaning up the Buffalo River watershed.

Sincerely,

Scharmel Roussel
