Questions Comments:

Dear ADEQ, I'm emailing to ask you to put the Buffalo river in a category 5 for impaired water bodies? If you believe the C&H hog facility isn't responsible for the impaired water in the Buffalo river why not place it in a category 5? Don't allow the Buffalo river to end up like Florida's water crisis. I don't think anyone wants to see dead fish,wildlife or sick people like we ve seen in Florida in the Buffalo river. Please remember the livelihoods of others depend on the Buffalo river. Do what is right for the majority not the few. Thank you! May God bless Arkansas!
