Subject: ADEQ and water quality

Dear Ms. Clem, I am extremely concerned about having clean water and air in the state of Arkansas. It is the reason I moved here 41 years ago. ADEQ has not been doing a very good job of protecting us from industrial interests destroying what making living in Arkansas worth while. Please, for the sake of the health of our state and the people and animals that live here do your job ADEQ.

Matter of fact I am quite angry and upset. I tried calling your office and you are obviously not easy to reach for comment.. Some how, I am not hopeful that I will be listened too. May your children and grandchildren be able to enjoy places like the Buffalo River or even the parks in Little Rock.
